✦ Team Player

Experience:

General Assembly's Web Development Immersive   July 2017 - October 2017

A immersive web development program which was both a educational course as well as equivacable to on the job training. Actively engaged in more than 500 hours of hands on training over just three months. Most importantly through this program I earned the ability to adapt to and learn any language for whatever the situation may warrant.

✦ Experienced real world development enviroment with standards and deadlines.

✦ Focused on learning patterns to apply knowledge to a multitude of languages.

✦ Completed a myriad of projects which encompassed several programming languages.

Landa Pressure Washers of RI   June 2012 - Present

My father's business which focuses on the sale, service, and maitenence of commercial and industrial cleaning equipment. By virtue of it being a family business I had many responsibilites ranging from sales, inventory management, machine repair and much more.

✦ Managed large inventory including over 100,000 small parts and assembled machines.

✦ Activeley built relations with business owners and helped educate them on our products.

✦ Repaired and assembled machines including pressure washers, floor scrubbers, and more.

Unetixs Vascular - Service Coordinator   June 2015 - October 2016

Medical equipment manufacturing company based in North Kingstown. I was responsible for a team of service technichians and maintaned the service department.

✦ Drastically cut in house time of customer's repairs.

✦ Tracked down and recovered multiple laoners which were lost before my tenure.

✦ Set up new repair department and facilitated income of new line purchased by company.

Projects:

✦ **Tic-Tac-Toe Game:** Included building game logic from scratch and established communication with a API for user authentication.

✦ **Game Collection App:** Created a front end client for user's which communicates with a backend built to store user's data

✦ **ChrisTurcoLaw.com** - Site for a newly established law firm.

✦ **Project 3:** Created a front end client for user's which communicates with a backend built to store user's data

Education:

Univeristy of Rhode Island: 2009 - 2014
Major: Kinisiology - Health Fitness

Affiliations:

Rhode Coders Club
